2009 Design Science Lab: *Blueprint for a Global Green Economy*

Where **you** develop solutions to critical global and local problems. Join us for this 5th Annual Design Science Lab, June 22–29, at the United Nations and Chestnut Hill College in Philadelphia.

Who attends

college and high school students, as well as teachers and young professionals from around the world, who want to contribute effectively to the world.

What you learn, do, get

- **Be briefed by United Nations experts** on global problems and opportunities.
- **Learn about critical global problems** that impact the lives of everyone in the world, as well as the opportunities associated with these problems, and what we can do to change the current situation.
- **Learn and use Design Science**—a problem-solving and strategic design and planning methodology, developed by Buckminster Fuller and other scientists and designers, that will be of use to you for the rest of your life. You will work collaboratively to develop a solution to meet one or more of the UN's Millennium Development Goals.
- **Present your work at the UN** to a team of UN and other experts. Your work will be published in a book after the Lab's conclusion.
- You will receive a **CD ROM packed with over \$1,000 worth** of the latest books and reports from the UN and dozens of other international agencies on the state of the world, energy, food, water, population, education, health, climate, the global economy and other topics.
- **Work very hard and have fun doing it.**

About us

The Design Science Lab is a joint program of BigPictureSmallWorld and Global Education Motivators. The Lab is directed by Medard Gabel, developer of the World Game (with Buckminster Fuller), and author of six books. Mr. Gabel worked directly with Buckminster Fuller for over a decade on various design projects.
